

PRESS RELEASE

Date: 5th August 2016

For immediate release

Paul Ravenhill joins growing team at Think.

Paul Ravenhill has joined Think Research as the Director responsible for Capability and Service Development. Paul, formerly Technical Director at Helios is best known for his work with European Commission's Industry Consultation Body and is the leading regulatory expert on Air Traffic Management in Europe.

Conor Mullan, Managing Director at Think explains: We are growing fast, and adding Paul to our team enables us to extend the services we can offer our customers. Paul's knowledge of the Single European Sky legislation and the policy issues surrounding ATM modernization will complement our operational and technical knowledge to help ANSPs and regulators understand challenges of actually implementing SESAR.

Paul Ravenhill commented: There is now real momentum towards implementing SESAR and indeed ATM modernization around the globe. Think have an excellent reputation for helping their customers understand and validate new operational concepts and technologies. My aim is to help Think customers understand the same change from the regulatory and organizational perspectives to ensure successful CNS/ATM deployment.

About:

Think Research (www.think.aero) is a successful independent ATM and Airports consultancy providing expertise and insight to deliver performance improvement through concept development, validation and implementation.
